Author Index Volume 185 (2006)

- Al-Kurdi, A.** and **D.R. Kincaid**, LU-decomposition with iterative refinement for solving sparse linear systems 391–403
- Bertolazzi, E.**, **F. Biral** and **M. Da Lio**, Symbolic-numeric efficient solution of optimal control problems for multibody systems 404–421
- Biral, F.**, see **Bertolazzi, E.** 404–421
- Carletti, M.**, Numerical solution of stochastic differential problems in the biosciences 422–440
- Cash, J.R.**, **F. Mazzia**, **N. Sumarti** and **D. Trigiante**, The role of conditioning in mesh selection algorithms for first order systems of linear two point boundary value problems 212–224
- Censor, Y.** and **A. Segal**, Algorithms for the quasiconvex feasibility problem 34– 50
- Da Lio, M.**, see **Bertolazzi, E.** 404–421
- Deelstra, G.**, see **Vanmaele, M.** 51– 90
- Demiralp, M.**, see **Tunga, M.A.** 107–132
- Dhaene, J.**, see **Vanmaele, M.** 51– 90
- Easwaran, C.**, **L. Fialkow** and **S. Petrovic**, Can a minimal degree 6 cubature rule for the disk have all points inside? 144–165
- Enright, W.H.**, Verifying approximate solutions to differential equations 203–211
- Fialkow, L.**, see **Easwaran, C.** 144–165
- Fijnvandraat, J.G.**, **S.H.M.J. Houben**, **E.J.W. ter Maten** and **J.M.F. Peters**, Time domain analog circuit simulation 441–459
- Filippova, D.**, see **Sun, T.** 1– 18
- Ghelardoni, P.**, **G. Gheri** and **M. Marletta**, A polynomial approach to the spectral corrections for Sturm–Liouville problems 360–376
- Gheri, G.**, see **Ghelardoni, P.** 360–376
- Goovaerts, M.J.**, see **Vanmaele, M.** 51– 90
- Gorbunov, V.K.** and **I.V. Lutoshkin**, The parameterization method in optimal control problems and differential–algebraic equations 377–390
- Guglielmi, N.**, Open issues in devising software for the numerical solution of implicit delay differential equations 261–277
- He, Y.**, A new double projection algorithm for variational inequalities 166–173
- Houben, S.H.M.J.**, see **Fijnvandraat, J.G.** 441–459
- Hugger, J.**, Wellposedness of the boundary value formulation of a fixed strike Asian option 460–481
- Kincaid, D.R.**, see **Al-Kurdi, A.** 391–403
- Krogh, F.T.**, On developing mathematical software 196–202
- Kumar Kar, T.**, Modelling and analysis of a harvested prey–predator system incorporating a prey refuge 19– 33
- Lencastre, M.**, see **Santos, F.C.G.** 326–346
- Liinev, J.**, see **Vanmaele, M.** 51– 90
- Luo, J.**, Asymptotic behavior of solutions of second order quasilinear differential equations with delay depending on the unknown function 133–143
- Lutoshkin, I.V.**, see **Gorbunov, V.K.** 377–390
- Marletta, M.**, see **Ghelardoni, P.** 360–376
- Mazzia, A.** and **M. Putti**, Three-dimensional mixed finite element-finite volume approach for the solution of density-dependent flow in porous media 347–359
- Mazzia, F.** and **T. Politi**, Preface 191–195
- Mazzia, F.**, see **Cash, J.R.** 212–224
- Noschese, S.** and **L. Pasquini**, Eigenvalue condition numbers: Zero-structured versus traditional 174–189
- Pasquini, L.**, see **Noschese, S.** 174–189
- Pavarino, L.F.**, see **Zampieri, E.** 308–325
- Peters, J.M.F.**, see **Fijnvandraat, J.G.** 441–459
- Petrovic, S.**, see **Easwaran, C.** 144–165
- Politi, T.**, see **Mazzia, F.** 191–195
- Putti, M.**, see **Mazzia, A.** 347–359
- Saad, R.**, An optimal schedule for Gaussian elimination on an MIMD architecture 91–106

- Santos, F.C.G.** and **M. Lencastre**, An approach for FEM simulator development 326–346
- Segal, A.**, see **Censor, Y.** 34– 50
- Sderlind, G.** and **L. Wang**, Adaptive time-stepping and computational stability 225–243
- Sderlind, G.** and **L. Wang**, Evaluating numerical ODE/DAE methods, algorithms and software 244–260
- Sofroniou, M.** and **G. Spaletta**, Hybrid solvers for composition and splitting methods 278–291
- Spaletta, G.**, see **Sofroniou, M.** 278–291
- Sumarti, N.**, see **Cash, J.R.** 212–224
- Sun, T.** and **D. Filippova**, Long-time error estimation for semi-linear parabolic equations 1– 18
- ter Maten, E.J.W.**, see **Fijnvandraat, J.G.** 441–459
- Trigiane, D.**, see **Cash, J.R.** 212–224
- Tunga, M.A.** and **M. Demiralp**, Hybrid high dimensional model representation (HHDMM) on the partitioned data 107–132
- Vanmaele, M.**, **G. Deelstra**, **J. Liinev**, **J. Dhaene** and **M.J. Goovaerts**, Bounds for the price of discrete arithmetic Asian options 51– 90
- Verner, J.H.**, Starting methods for two-step Runge–Kutta methods of stage-order 3 and order 6 292–307
- Wang, L.**, see **Sderlind, G.** 225–243
- Wang, L.**, see **Sderlind, G.** 244–260
- Zampieri, E.** and **L.F. Pavarino**, Approximation of acoustic waves by explicit Newmark s schemes and spectral element methods 308–325
